PROFESSIONAL SUMMARY

I am a macro-economist with focus on the field of labor, international Growth & development, and urban economics as well as researcher in health. My research focus on energy producing countries, Africa, US, China and lusophone economies. I have 23 years of professional and academic experience overall at various levels. During my career, I have developed a strong leadership and negotiations skills, and the ability to build cohesive, productive teams while fostering and encouraging creativity and quality research as well as a track record on effective organizational, communication skills, and excellent inter-personal relations.

I have also developed a sound use of statistics software, statistical models particularly causal inferences, regression discontinuity, instrumental variables, two-way fixed effects, difference in difference (DID) and synthetic controls.

I use extensively R, Stata, Eview and Excel and have a sound record at participating in academic and professional field conferences, particularly at LERA and ASSA annual conferences, as presenter or as a discussant.

I have lived in the United States of American for over 17 years where I did most of my academic studies at high education level. I have membership in several US academic and research organizations.

My recent trip to Namibia in May and June aims at supporting my current research on Comparative case study on development policy between Angola and Namibia and the role of institutions in economic development.
